

College of Arts and Sciences

Department of Physics
and Astronomy

THE UNIVERSITY OF
ALABAMA
ARTS & SCIENCES

October 25, 2006

To whom it may concern:

This will attest that I have been involved in developing the science case for the proposal "Science Teaching through Astronomical Research (STAR) for K-12 West Alabama Schools via the Southern STAR Telescope" submitted by Tarsh Freeman, and would continue involvement in research and operation of the instrument should this proposal be funded by the NSF.

Sincerely,

William C. Keel
Professor of Astronomy
